

*Carolyn*

One of the  
RSM team

The background features a woman with blonde hair, smiling, wearing a dark green blazer. Below her is a large, abstract graphic with vibrant, blurred light trails in red, orange, yellow, green, and blue, suggesting motion and technology. The text "Board cyber awareness training" is overlaid on a blue rectangular box in the lower right.

# Board cyber awareness training

# The threat of cyber attacks

## An ever-evolving threat

The cyber threat and regulatory landscape is **always changing and growing**, coupled with businesses needing to **respond to client demand**, makes cyber a **complex issue** to tackle.

## A rise in sophistication and frequency

Cybercriminals are becoming **increasingly sophisticated** in their methods and launching attacks **more often** to **steal data** and target systems to **disrupt business processes and operations**.

## A severe global risk

The threat has become so great that the World Economic Forum have ranked **cyber insecurity** as the **fourth** most severe risk over the next 2-year period and **eighth** over the next 10 years.

## What can your business do?

To manage this threat, Boards must have an **awareness of cyber risk**, be able to **challenge management's plans**, and **set the tone of expectation** for investment in cyber to protect businesses.

# How RSM can support your cyber awareness

- The accountability for effective cyber security resides with the Board and robust cyber security starts with good awareness. In our experience, far too many Boards have not undertaken effective cyber awareness training.
- We work with Boards to build their understanding of the cyber challenge through the lens of the business they are responsible for.
- The insights we share are based on real-world cyber events, our sector experience, and deep-rooted knowledge of regulations. Furthermore, we bring this to life through a practical exercise to test knowledge and promote leadership challenge and debate.

## Our approach to cyber awareness training supports you in:

### Gaining knowledge

Creation of tailored content including:

- The current threat landscape affecting your business
- Insights of what we've seen in your sector
- Unpacking actual cyber-attacks to generate learnings and insights

### Understanding expectations

Provide clarity of regulatory expectations and drivers for cyber security including:

- Relevant regulations
- Level of cyber control expectations
- Cyber considerations for the Board

### Gaining practical awareness

Experience a high-level test of your response capability with a walkthrough of how a cyber-attack would unfold:

- A taste of a cyber-attack using a real-world attack scenario.

"Organisations (including both business and cyber leaders) must continue to invest in and maintain an awareness of essential security fundamentals."

World Economic Forum Global Cybersecurity Outlook 2024

"The Board is responsible for ensuring that risks to delivering the strategy are identified, evaluated, and mitigated in line with the business risk appetite."

UK National Cyber Security Centre (NCSC)
